Dr. Josh Yoder
Medical Science Liaison
SANOFI PASTEUR

"My Path to Becoming a Medical Science Liaison: A Journey from Academia to Biotech to Pharma”

Dr. Yoder earned his B.S. degree at Penn State (Class of '00) with a major in Biochemistry and Molecular Biology. He was one of Dr. Craig E. Cameron’s first undergraduate students. After graduation, Dr. Yoder joined the Ph.D. program in Virology at Harvard, in Steve Harrison and Phil Dormitzer’s lab, where his work focused on Rotavirus Cell Entry. Then, he worked as a post-doc at Purdue University (Dr. Michael G. Rossman) and Penn State College of Medicine (Dr. Susan Hafenstein), and as a research associate at the University of Pittsburgh (Dr. James F. Conway).

In 2013, he joined Thermalin Diabetes as a Development Scientist, where he worked on the development of next-generation insulin analogs. Currently, Dr. Yoder is a Medical Science Liaison at Sanofi Pasteur, the vaccine division of the multinational pharmaceutical company Sanofi.
